January 2026 Newsletter

From the Superintendent

Dear Parents, Families, and Community Members,

On behalf of the Harris-Lake Park Schools, I would like to extend my sincere thanks for the incredible support, patience, and flexibility you have shown following the recent boiler issue at our elementary school.

Unexpected challenges like this test more than just facilities—they test a community. Your understanding, encouragement, and willingness to adapt as we work through temporary adjustments have made a meaningful difference for our students and staff. We are especially grateful for the trust you have placed in us as we prioritize student safety and continuity of learning.

We remain committed to keeping you informed and to moving forward thoughtfully and transparently as plans for our new facility are finalized. Your partnership and support are deeply appreciated, and they reinforce what makes our school community so strong.

Thank you again for standing with us and for your continued support of our students and schools.

Sincerely,
Mike Thompson
Superintendent

Too sick for school?

Nearly all children get sick from time to time. Sending a sick child to school may make the child more miserable and spread a contagious illness to classmates. The following guidelines will help parents decide whether their child is too sick for school.

Fever is an important symptom, especially if it occurs along with a sore throat, nausea or a rash. Fevers are ok because the higher body temperature is a result of the immune system working so the body can heal. Children with a temperature of 100.4 degrees or higher should stay home. Your child should be fever-free 24 hours (without medication) before returning to school. Remember to follow the directions for your thermometer.

Diarrhea and vomiting make children very uncomfortable. Keep your child home until the illness is over, and for 24 hours after the last episode (without medicine).

Strep throat is highly contagious and the child may complain of a sudden sore throat and fever and often stomachache and headache. The child may return to school 24 hours after the antibiotic treatment begins and if no fever.

Pinkeye or conjunctivitis is highly contagious and uncomfortable. Symptoms include eyes burning, itching and a cloudy or yellow discharge from the eye. Child should stay home until doctor recommends your child return to school. Medication may be prescribed.

Flu/Influenza symptoms include body aches, high fever, chills, congestion, sore throat and in some children vomiting. These symptoms usually come on very quickly! Rest and *sometimes* medication is prescribed.

Respiratory viruses (flu, covid, RSV): The IDPH guidelines are that you can go back to your normal activities when, for at least 24 hours, both are true:

- Your symptoms are getting better overall, **and**
- You have not had a fever (and are not using fever-reducing medication).
- When you go back to your normal activities, take added precaution over the next 5 days, such as taking additional steps for cleaner air, hygiene, masks, physical distancing, and/or testing when you will be around other people indoors. This is especially important to protect people with factors that increase their risk of severe illness from respiratory viruses.

Frequent hand washing is one of the best ways to prevent the spread of infection. Please encourage frequent hand washing at home and at school.

If your child needs to stay home due to illness or other reasons, please call the school. For safety, we need to know why your child is not at school. Remember to always make sure that the school knows how to reach you during the day and that there is a back-up plan and phone number if we cannot reach you.
